

- Signal survey for CATV, installers & municipalities

Make signal visible. Signal Survey

Wi-Fi, 4G/5G NR and GPS on the Android phone you already have.
Surveys that need hardware costing thousands, from free. Pass, caution or fail at a glance, and a report you can hand over, on the spot.

Beta testers wanted
testers get Pro **30 days free**

- ✓ No hardware, free to start
- ✓ Pass / fail at a glance
- ✓ Data stays on the phone
- ✓ English & Japanese reports

\$0 hardware

Your own Android

Pass / fail

At a glance

Wi-Fi + 4G/5G NR

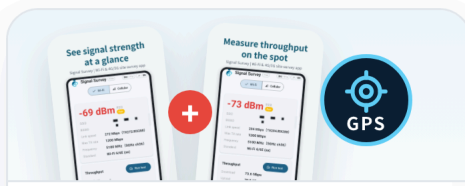

One app for both

Report on site

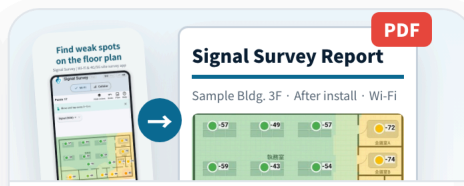

PDF, Excel, KML

WHY SIGNAL SURVEY

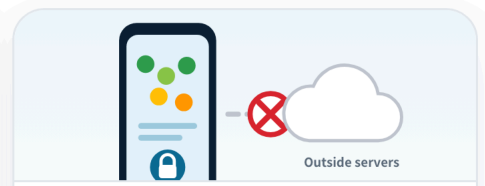

Three reasons to choose it

01
Wi-Fi, 4G/5G NR and GPS on one phone.
What usually takes separate apps or kit, on your own Android phone in one app, logged as often as every 0.5 s.

02
Measure, then report on the spot.
A photo of the floor plan is all you need. Tap to build the heatmap and hand over a PDF report.

03
Your data never leaves the phone.
Records stay on the device. No upload to our servers, no account, no ads or analytics.

FOR EVERY SITE

From first-timers to experts

First time

Standard display, auto interval, results as pass / caution / fail.

Experts

Pro display and manual settings show every item; Excel keeps all.

CATV & ISPs For in-home Wi-Fi visits

- ✓ Heatmap a subscriber's Wi-Fi on the floor plan
- ✓ Before / after report for mesh and extenders
- ✓ Cellular and regional BWA in the same app (with a SIM)

Installers & contractors All the way to the report

- ✓ Floor plan from one photo, just tap
- ✓ PDF report on the spot (with your logo)
- ✓ Channel load and interference explain slow spots

Municipalities & shelters For gym Wi-Fi checks

- ✓ Will the Wi-Fi hold up when people gather?
- ✓ Add access points or a faster line?
- ✓ Offline maps; data never leaves the phone

Engineers & experts Every number on site

- ✓ RSRP, SINR, PCI, 5G NR, neighbours; carrier or local 5G
- ✓ Cell sites, thresholds and interval your way
- ✓ Unreadable values stay blank; Excel has all

COMPARISON

How it compares

	Signal Survey	Cellular test apps	Wi-Fi survey apps	Hardware survey kits
Wi-Fi and 4G/5G NR in one app	◎	—	—	△
Floor-plan heatmap	◎ one photo	△	○	○
Pass / caution / fail (congestion check)	○ free	—	△	△
PDF report on the spot (EN / JA)	◎	—	△	○
Before / after labels & comparison	○ report in Pro	—	△	○
GPS satellite reception	◎	△	—	—
Japanese UI & Japan band table	◎	△	△	△
No special hardware	◎	◎	◎	—
Typical price	Free+	Tens of dollars	Tens to hundreds /yr	Thousands+

◎ Strong ○ Supported △ Partial / depends — Not supported * General comparison by product type, based on public information on major products as of October 2026.

WORKFLOW

Find the trouble spots, then bring the meter

Survey the whole site with Signal Survey, then use a dedicated instrument only where it matters. Less time and cost per job.

PRICING

Plans

Free
\$0
